

## VILLA TORLONIA TOUR

Before Christmas the II H and our English teacher went to Villa Torlonia. When all the crew was ready, we took off. The journey wasn't easy. Our guide was a bit confused that day so we got lost very soon. But here our saviour came! Simone, our knight in shining armour, led us to destination.

During the walking, our heroes had to face the mud and the quicksand.

Once there, we firstly admired the Casina delle Civette. It looks like a fairytale house with its mixture of colours in Liberty style, its stained-glass windows and its nice tiny balcony.

As usual, while the group of students-guides was explaining in English, other guys had fun taking photos and chatting.

The sun was shining but it was very cold and we were freezing, so we kept rushing in the sun. We saw other monuments and buildings: The portly Casino Nobile, the true False ruins, the solemn temple of Saturn, the stale Tribuna with fountain.

At the end of the our adventure we came across a narrow bed and some of our classmates stopped to take a photo in front of it pretending to be dead. After all these ups and downs we came back to school, our prison (just joking!).

It was a great day and this adventure will be imprinted on our memory forever.
