

Manga

We love reading manga and we would like to introduce this kind of comics to our readers.

Manga are Japanese comics that you read from right to left and usually are in black and white. The manga's format is smaller than the American comics' one, but manga have more pages. Manga stories are rich in fantastic details because their stories are set in places that don't exist in the real world. The most famous manga are: "Dragonball", "Naruto", "Saint Saya" and "One piece".

"Dragonball" talks about a young boy called "Goku", who lives on the earth but comes from another planet called "Vegeta". This boy is fond of martial arts and fights against a lot of enemies coming from other planets with very powerful attacks, like the "HameHameHa".

"Naruto", instead, talks about a boy that is a ninja and fights to become a "Hokage", that is to say the strongest ninja of the village. "Naruto" is a famous ninja because he has got the power of the "nine tails demon fox" inside himself. His powerful attack is the "rasengan", and with this attack he defeats a lot of enemies.

"Saint Saya" is the story of the knights of the zodiac and every fighter has a different armour that represents his constellation and gives him strength.

Finally, "One Piece" is the story of a crew of pirates whose captain is called "Ruffy". He eats a special sea fruit which gives him special gifts, so he becomes like "Mr. Fantastic" of the "fantastic 4".
